Washington, D.C. 20554

Dear Ms. Dortch:

Re: Public Notice DA07-3644, August 16, 2007: New public safety narrowband operations outside of the 700MHz consolidated narrowband blocks prohibited as of August 30, 2007.

DA07-4168, October 5, 2007: Public Safety and Homeland Security Bureau announces an October 23, 2007 deadline for filing 700MHz relocation certification information

PS Docket No. 06-229; WT Docket No. 96-86

On September 18, 2007, the state of Illinois' STARCOM21 voice radio system began statewide operation. The transition by State agencies from their VHF systems (in downstate Illinois) began on March 28, 2007, in extreme southern Illinois and followed a methodic path cumulating in the migration from the ISP's 800MHz EDACS system in Chicago to the STARCOM21 network in mid-September.

Background

STARCOM21 is a privately owned and operated statewide voice radio network, built and maintained by Motorola, Inc. which utilizes NPSPAC 800MHz, 700MHz and 800MHz frequencies licensed to the state of Illinois, and 800MHz frequencies licensed to other Illinois public safety entities utilizing the network, in a cooperative manner, for the purpose of efficient public safety communications across the State. Public safety entities purchase the end-user equipment and pay a monthly fee to Motorola for each mobile and portable radio accessing the system. Motorola is solely responsible for the technical operation and maintenance of the system; the state of Illinois and system users are responsible for securing the frequencies used in support of the system.

The network design allows and promotes federal, state, county, and municipal and other local public safety entities to subscribe to the network for their day-to-day operations, plus allowing for the coordination of their activities with other public safety entities as an urgent need arises. Growth and expansion of the system itself will be on-going as long as there are public safety entities wishing to subscribe to the system.

Current Participants on the STARCOM21 Network

700MHz radio units operating on the State of Illinois STARCOM21 network:¹

<i>Total:</i>	8,112	679	8,791 ²	100

In addition, there were 762 vehicular repeaters operating in the 700MHz bandwidth on the STARCOM21 system on August 30; or programmed, deployed and awaiting installation in field units as of that date. It is anticipated that the installation of the remaining equipment will be accomplished by February 28, 2008.

¹ See Attachment "A" for a listing of the available contacts for each entity.

² See Attachment "B" for additional inventory information.

Clarification

The state of Illinois is providing the following information as required in Public Notice DA07-4168 dated October 5, 2007.

1. Total number of narrowband mobile and portable handsets in operation in channels 63 and 63 (764-767/794-797 MHz), and the upper 1 megahertz of channels 64 and 69 (775-776/805-806 MHz):
Answer: 8,112 handset radios, 762 vehicular repeaters
2. Areas of operation of the mobile and portable units (such as defined by the jurisdictional boundaries of the relevant public safety departments):
Answer: The jurisdictional boundary of the state of Illinois.
3. Total number of narrowband base stations serving these handsets in operation:
Answer: 233 base stations as of August 30, with 10 base stations to be added before December 31, 2007
4. Location, in latitude and longitude, of the identified base stations:
Answer: See Attachment "C."

As the license holder and one of the principle users of the network, the state of Illinois is anxious to promote and expand the use of the network among the various public safety entities within the State. The network design promotes interoperability and coordinated response to the wide range of threats to citizen safety. Upon final system acceptance, scheduled to occur before the end of 2007, the State will work in cooperation with Motorola to promote the use of the system by federal, state, county and local public safety agencies, and assist in seeking grant and federal funding to assist those agencies who wish to participate on the network, but who are unable to afford either the equipment purchase, the on-going access fees, or both. The State recognizes that the more agencies that participate on the system, the greater the efficiency of the frequency utilization and the better the services available to all the users.

Request for Waiver

The State, in its effort to support and promote the use of the STARCOM21 network, is hereby petitioning the Federal Communications Commission (FCC) to grant the state of Illinois, on behalf of the STARCOM21 voice radio network, a waiver allowing the State and its radio service vendor, Motorola, to proceed with the expansion of STARCOM21 services to the public safety community within the State who request access to the network, utilizing the designed frequency plan. The State is requesting that the deployment of units as defined herein be considered by the FCC as an expansion of the initial employment of the system by charter participants and considered and accounted for in a manner similar to those units in operation prior to September 1. This waiver is sought in accordance with 47 CFR 1.925 (3) (ii) in that the unique timing of the FCC's setting of the August 30th deadline coincided precisely with the State's transition to the

new voice radio network, designed and operating on frequencies impacted by the ruling. The principle deployment effort was completed on September 18, 2007. The State anticipates final system acceptance will occur prior to the end of 2007; and that the system will continue to grow as more agencies in the State opt to migrate to the system for years into the future.

In view of the aforementioned unique or unusual circumstances of the instant case, application of the prohibition on new public safety narrowband operations outside of the 700MHz consolidated narrowband block after August 30, 2007 (Public Notice DA07-3644, dated August 16, 2007), would be inequitable, unduly burdensome, and contrary to the public interest. Furthermore, given the existing utilization of the system by a multiplicity of state, county, and municipal governments across all public safety disciplines, including law enforcement, emergency medical response, public works, transportation, public health, and drug and terrorism task forces, just to name a few, application of this prohibition would also be contrary to the FCC's goal of increase spectrum efficiency and interoperability.

Certification

On behalf of the state of Illinois, I am hereby certifying that the state of Illinois' STARCOM21 system, as of August 30, 2007, supported 8,112 radios. At the time of the State's transition, 8,791 radios and 762 vehicular repeaters were in operation, or programmed and available for use on, the state of Illinois' STARCOM21 voice radio system.

The information included within this correspondence, is true, complete, correct and provided in good faith. Please do not hesitate to contact me should you require clarification or additional information.

Sincerely,

Lt. Deb Garde
Illinois State Police
Communications Services Bureau
